Hi, my name is Dmitry. I work now as Front-End engineer in the IT-school. Current project is the development of the learning web portal «The Lessoner» which has a high priority for the company. Together with PM I worked on project specification, designing a project in Figma, creating tickets (we work using agile process). I am very good team player and always support my colleges in case they have problem with the code. My tasks require solid knowledge in React.js, TypeScript, SCSS HTML.
